01 EVERY DECISION CREATES A PATH

Each choice, no matter how small, moves you in a direction. These choices compound over time, creating a unique path that leads to a specific destination.

02 SMALL DECISIONS COMPOUND

A single decision may seem insignificant in the moment, but it becomes part of a chain. Consistent decisions, repeated over time, create massive differences in outcome.

03 YOU CONTROL THE INPUT

You cannot control everything that happens to you, but you can control how you respond. That choice shapes the next step, and the next, and the next. Your responses are the levers that direct your destiny.

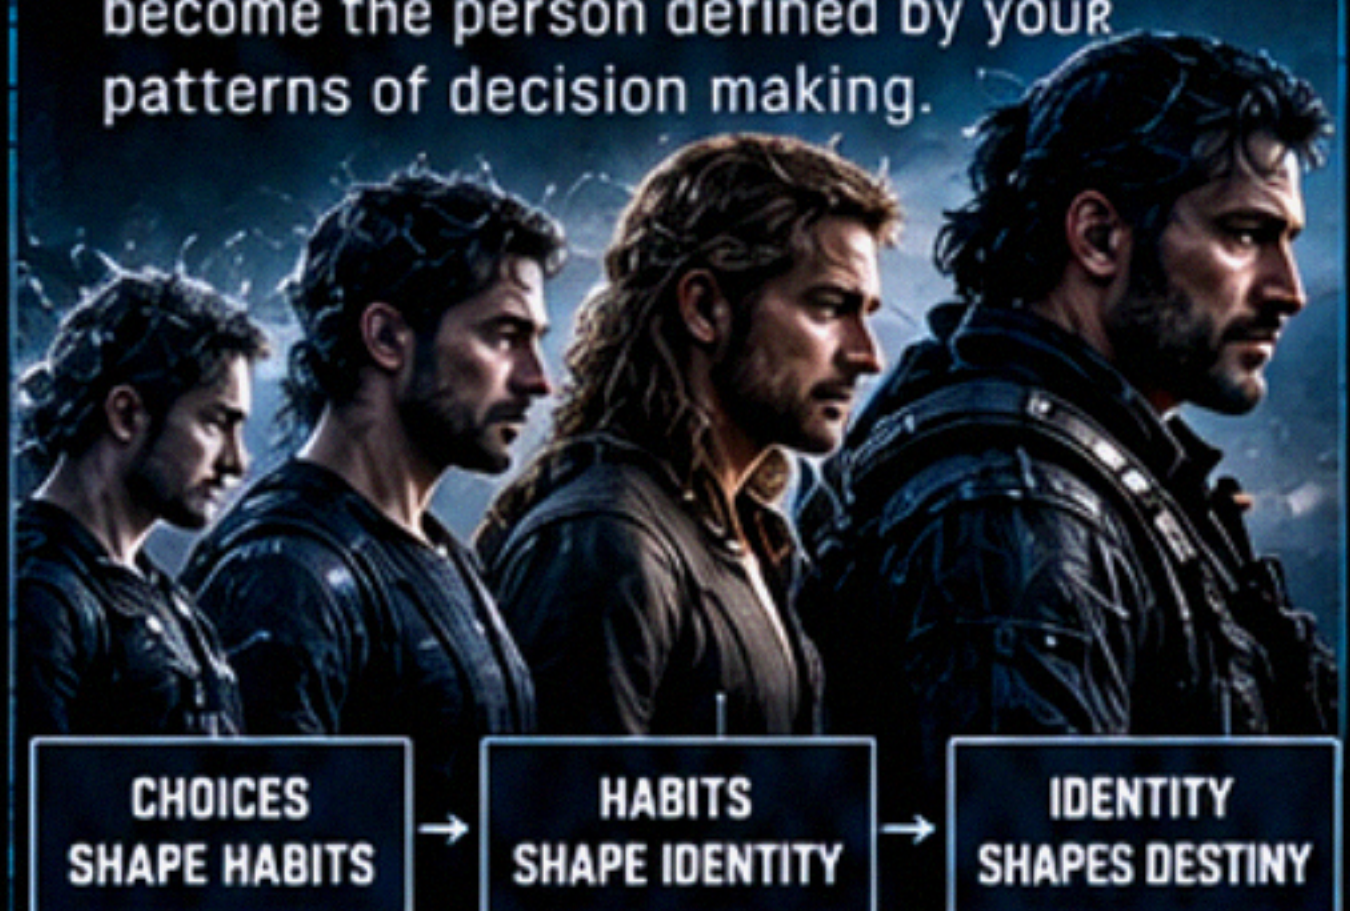

YOU CAN CONTROL:

- What you focus on
- The standards you set
- The actions you take
- The people you allow in
- How you respond to challenges
- How consistent you are

04 DECISIONS SHAPE IDENTITY

Your decisions do more than change your circumstances. They shape who you become. Each choice reinforces a certain identity, and over time you become the person defined by your patterns of decision making.

05 CRITICAL DECISIONS CREATE INFLECTION POINTS
